- **Autonomous ice cube production and sales unit**

Kiosk'ice delivers instant, 24/7, fresh and crystalline 20 gram ice cubes, in bulk or in biodegradable pouches, at your disposal. A smart distributor, Kiosk'ice responds to the peak of consumption by automatically managing the stock to produced.

- **Easy to install and use**

With its design and small footprint Kiosk'ice will easily find its location in your establishment.

Its installation only requires a connection to the drinking water system and electricity. From there, the dispenser is ready to operate!

Customers choose the amount of dose they want to buy and pay, either in cash or by credit card*

* The kiosk'ice is equipped in series with a coin-changer.
Different payment modules are available as an option.

High profitability and reliability

**Real-time
connected
interface for
optimized sales
tracking.**

**Biodegradable bag dispenser.
Roll with 250 pre-cut transport
bags.**

- **High profitability from the first year: at a price of 1 euro the dose of 500 grams and a low cost of use, the Kiosk'ice ensures you a quick profit.**
- **The reliability of industrial production: innovative patented device, the first of its kind in Europe, Kiosk'ice is entirely designed and realized in France. It is a robust and reliable distributor, designed and tested to face every weather. It will allow you to sell optimal ice cubes and an ongoing service.**

An Increased environmental responsibility

- **A low carbon impact unit :**
Kiosk'ice has a low carbon footprint compared to the traditional ice cube industry due to its short chain process, no transport and on-demand production. Bulk distribution also reduces waste associated with systematic packaging
